Subject: Microsoft Settlement

Hello,

I am very displeased with the proposed settlement between Microsoft and the United States Department of Justice. If the settlement were to go through as it stands now, there would be no benefit to the consumer. The settlement is a bad idea.

Microsoft has played unfairly in the computer industry, hiding their APIs, making secret deals, purchasing companies to decimate markets and in general not playing well with others. Please make Microsoft pay for what they have done.

I have never met a person who was excited to shell out \$400 for office, nor have I met anyone who can say they "love" all the great features of windows.
